

Hello everyone- We wanted to provide some clarification on a few questions that have been asked- If there is a section within the RFP that you cannot meet or you have an alternative option, we will still accept your proposal. We just ask that you follow the Exceptions section listed below that is found on page 15 in the RFP. Because of the timeline there might be things within the RFP that cannot be done or there is an alternative solution.

Exceptions:

Certain exceptions to the GHAC specifications may be considered in limited circumstances. Providers seeking an exception must provide a detailed explanation as to why the Provider is seeking an exception, details related to the sought after exception and options to comply as closely as possible to the GHAC specifications, in writing, to GHAC. The purpose of the pre-bid conference is to provide clarification of the RFP and its specifications before submission of proposals. If an organization has questions regarding the RFP and its specifications, a request for clarification should be submitted at or before the pre-bid conference to obtain a ruling on the matter before submitting the proposal.

Correction to RFP:

This wording below that was on page 21 is removed- OMCBA **does not have required response times**

Reports shall be based upon the OCMCA response time directives (current standards below). Changes may be implemented by OCMCA
